

## FLOWBIRD ACCESS S5

PAYMENT, ACCESS AND INFORMATION SERVICES  
IN A BOX

# THE MOST COMPACT AND LIGHTWEIGHT S5 EVER

Flowbird Access S5 is packed with **performance** and is as **powerful** as our next generation S5 range parking terminals, but as a mini sized version.

Access S5 has a strong and rugged design made in brushed aluminum to stand against rough weather and vandalism.

**The large integrated 9,7"** touch screen with full video support makes it excellent for information and commercial purposes.

Access S5 has an integrated Flowbird Pay contactless reader as standard and a QR code reader as an option. Access S5 is designed for many use areas and can be used as an On/Off-Street parking terminal or to start an EV charger / Schuko outlet.

## Increase security and keep users safe

Access S5 makes sure registered users or users having their vehicles in a garage always have secure access, even during closed hours. Multiple identification methods are supported with License plate, tap or QR-code and door control is already built in.

## Flowbird Digipay

Digital Point of Sales offers a seamless experience

- Extend your parking through MyParking
- Flowbird Access S5 remembers the motorist information through the recall function.
- Digital receipts through SMS/e-mail.

- Crystal clear 9,7" with full image and motion video support
- Heat resistant front face in brushed aluminum
- Flowbird Pay contactless module (debit/credit card)

## Easy mounting

Access S5 is designed to easily be mounted on a wall, pole or a table stand.

- QR code reader
- Mobile payment options such as Vipps and Swish
- Digital receipt over SMS/e-mail
- Ultra low power consumption (12V)

## Compatible with other Flowbird Solutions

Access S5 can be used as a payment option at any On/Off-Street solution.

- Pay on foot (Flowbird GO!, GO+)
- Pay at the exit (Flowbird GO!)
- Pay for your On-Street parking (Pay by plate)
- EV charging.

## Flowbird HUB

Flowbird Hub is the core of Flowbird and is hosted in a highly secure, reliable and robust cloud environment.

All hardware components and applications are connected to the Flowbird Hub giving your agency one access point for system management and reporting.

Flowbird Hub provides real-time reporting via data and graphs.

Using our analytics and data visualization tools, custom reports can be built to give you a complete view of your system.
